Presidential Ponderings

As I write this, New Zealand is beginning a month, maybe longer, of lockdown on account of the COVID-19 virus pandemic.

I am fortunate as I still live on a 10-acre (4 ha) property, albeit with high density housing being built close by. I reflect how much more challenging it would be confined in one of the tiny 'Town Houses' that are being constructed; most without any garden.

Notwithstanding, the lockdown has stimulated a desire for people to attempt to grow some of their own food. The sale of both potting mix and vegetable seedlings immediately prior to the lockdown was phenomenal.

One suspects that many of the purchasers were first time gardeners with little or no experience. We are moving towards winter, and daylight saving is soon to end. Some of the vegetables being sold would be better planted in spring even here in Auckland, unless a greenhouse, tunnel house or vegetable pod were available. The problem is that many of the newbies will be disappointed and will conclude that gardening is not for them.

A similar situation exists with the sale of imported dahlia tubers in July, mid-winter. The tubers being sold are lifted in the previous Northern Hemisphere autumn and are stored prior to export to New Zealand. By July, had the tubers stayed in the Northern Hemisphere and been planted, they would have produced plants in full flower. As a consequence, the imported tubers packed in plastic bags start to grow and the resultant shoots are trapped and become distorted.

If planted mid-winter the ground is too cold and often waterlogged. If left in the bags the tubers dehydrate and are often dead by October/ November when they should be planted in New Zealand. Again a serious disincentive for a novice gardener.

On a brighter note, Lincoln University has announced that it intends to offer two new courses in horticulture. One will be a three-year Bachelor of Commerce in Horticulture degree,

> while the other will be a one-year diploma in Horticultural Business, for those already working in the industry.

This is encouraging, as the teaching of horticulture in New Zealand has become increasingly depauperate in recent years. At the same time, one wonders whether the emphasis will be

on large-scale commercial production at the expense of amenity horticulture where a good grounding in botany is essential. We must also assume that Lincoln University's intentions will still be carried out after the COVID-19 crisis.

It is very sad that the National Diploma of Horticulture (NDH), which was run by the Royal New Zealand Institute of Horticulture (RNZIH) was disbanded when the Government of the day set up the various Industry Training Organisations. I had always considered the content of the NDH to be closer to a Masters degree than that of a Bachelors degree.

One bonus of the lockdown is that the neighbourhood is wonderfully quiet. No bleep, bleep, bleep of heavy earthmoving machinery nor the roar of nearby motorway traffic. Having escaped the daily commute over two decades

ago, I have often wondered, in our digital age, why so many people are still compelled to travel to and from a congested city centre each day.

OK, if one works in a factory or shop it is necessary for people to be there, but a great deal of office work can be carried out from home and meetings can be held remotely by video link. Members of the National Executive of the RNZIH from throughout the country, meet successfully in this way each month.

Maybe, after the current lockdown, and after people have seen that for many, the daily commute is not essential, might we see a reduction in the waste of time, waste of fossil fuels and consequent emission of greenhouse gases? Probably not. Human nature is not that logical.

Keith Hammett President, RNZIH

New members

Melrose Gardens (Nelson City Council) Miyazu Japanese Gardens (Nelson City Council)

Paripuma (Rosa Davison) Queen's Gardens (Nelson City Council) (Diana Montgomery) Waiongana Walter Peak Homestead Gardens (Real Journeys Ltd)

New Executive Members

We warmly welcome Margaret Barker and Tom Mayo, co-opted onto the RNZIH National Executive.

Hlomo Hlomo

Margaret Barker QSM, AHRIH, in her 6-star garden at Larnach Castle.

Margaret Barker attended Victoria and Auckland Universities graduating with a BA degree. In 1967, with her husband, she bought Larnach Castle which at that time was empty, derelict and surrounded by a tangle of overgrowth. Margaret and her family restored and furnished the Castle and created a garden. At Larnach Castle there is now a licensed café, a lodge to accommodate guests, and a ballroom from which to hold functions.

Margaret has served on many horticultural and promotional committees and has received a number of awards for both business and design. She is an Associate of Honour of the RNZIH and received a QSM for conservation of historic buildings. Margaret's garden is rated a 6-star 'Garden of International Significance' by the NZGT. Margaret is currently Founding Director of Larnach Castle Ltd.

In 2019 Margaret was appointed as the new Chair of the New Zealand Gardens Trust and in 2020 she joined the RNZIH National Executive as the RNZIH NZGT representative.

Tom Mayo standing alongside Metrosideros bartlettii in flower at Otari Wilton's Bush (2017).

Tom Mayo is a Wellingtonian, graduating from the Landscape Architecture program at Victoria University in 2012. During his studies he became interested in food production networks and the urban agriculture movement. He spent the next few years in Bristol, UK, involved in community urban agronomy projects before returning home to Wellington in late 2015 to pursue a career in horticulture and plant conservation inspired by local conservationist Chris Horne.

Tom has completed a horticultural apprenticeship and has worked with Wellington Botanic Gardens, Otari Wilton's Bush, Berhampore Nursery and the WCC City Horticulture team. Most recently he has been working in Wellington's Parks & Gardens team maintaining native bush and tracks across the region. He spends time outside of work enjoying botanising and assisting in propagating for conservation efforts.

Qualifications

- BDes. Landscape Architecture
- Cert. Amenity Horticulture
- Cert. Nursery Production.

Industry & Professional Associations

- New Zealand Plant Conservation Network
- New Zealand Botanical Society
- Wellington Botanical Society
- International Plant Propagators' Society New Zealand Region
- Royal New Zealand Institute of Horticulture.

RNZIH 2020 Conference and Annual General Meeting

Due to the COVID-19 situation we regrettably won't hold our planned Christchurch conference, Banks Lecture and AGM this year.

However, for our 2020 AGM, we are considering running a brief video-conference.

Please email office@rnzih.org.nz if you are willing to join us, so that we can assess the overall level of interest.

Thank you for your understanding and we will keep you informed.

Many other horticultural conferences have been cancelled for 2020, including for example:

- The 2020 Young Horticulturist competition.
- Arylies Garden Plant Fair in Auckland.
- The International Dendrology Society New Zealand (IDS–NZ) conference in Geraldine.
- The 2020 International Plant Propagators' Society New Zealand Region (IPPS–NZ) conference in Invercargill.

Congratulations

2020 RNZIH Awardees

Congratulations to our 2020 Royal NZ Institute of Horticulture awardees. 10 honorary awards have been conferred and one scholarship granted.

Further details of the recipients will be published in our journal and Facebook page.

Louise Beaumont (Havelock North) receives the Award in Garden History.

Russell Lowe (Te Puke) receives the Plant Raisers' Award.

Bill Steans (Timaru), Clare Shearman (Wellington), George Tregidga (Whangaparaoa), Penny Zino (North Canterbury), and Yvonne Baker (Auckland) are the newest Fellows (FRIH) of the RNZIH.

Alan Jolliffe (Christchurch), Bill Brett (Nelson), and Dr John Liddle (Waikanae) received Associates of Honour (AHRIH), the highest award conferred by the RNZIH.

Louise Beaumont, 2020 recipient of the Award in Garden History.

Bill Steans, 2020 Fellow of the RNZIH (FRIH).

Clare Shearman, 2020 Fellow of the RNZIH (FRIH).

George Tregidga, 2020 Fellow of the RNZIH (FRIH).

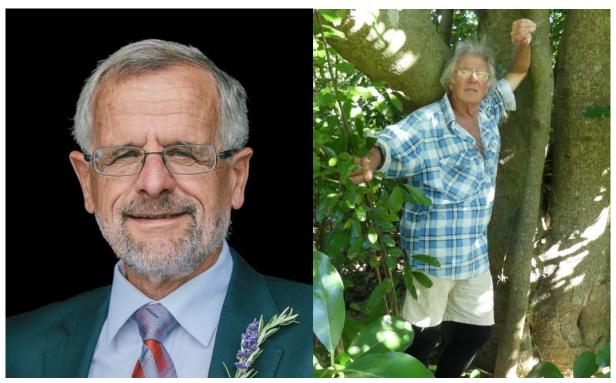

Penny Zino, 2020 Fellow of the RNZIH (FRIH).

Yvonne Baker, 2020 Fellow of the RNZIH (FRIH).

Alan Jolliffe, 2020 Associate of Honour (AHRIH).

Bill Brett, 2020 Associate of Honour (AHRIH).

Dr John Liddle, 2020 Associate of Honour (AHRIH).

Philip Simpson, 2020 recipient of the Peter Skellerup Plant Conservation Scholarship. Photo: Wendy Parr.

We also congratulate **Philip Simpson** (Takaka) who was awarded the Peter Skellerup Plant Conservation Scholarship. The financial assistance provided by the Skellerup award will allow Philip to conduct research for his new book on *Remarkable Plants of Aotearoa New Zealand* and will enable him to pursue information on species of conservation interest. Philip will visit various places where selected species grow in their natural environment and will discuss aspects of their conservation with local experts.

Congratulations to **Marie Wright**, a member of the Titahi Bay Horticultural Society, for being nominated and awarded a Kind Neighbour Award. In 2017 she was also awarded the Titahi Bay Horticultural Society Green Thumb Award. Marie actively maintains the gardens around the local surf club and along Titahi Bay.

Congratulations to **Jocelyn Dobson** of Invercargill who has been awarded the Frank Penn Memorial Award for 2020. This award is presented annually by the New Zealand Rose Society to recognise outstanding service to one of the local rose societies around New Zealand. Jocelyn has been a member of the Southland Rose Society since 1993 for which she has given outstanding service. She was made a life member in 2009.

We congratulate three awardees for being recognised in this years' New Year Honours.

Gillian Lady Deane and **Dr George Mason** are members of the RNZIH but were recognised for endeavours other than services to horticulture.

Jennifer Thompson of Lower Hutt became a Member of the New Zealand Order of Merit (MNZM) for services to amputees and horticulture. Jennifer is the current President for the Hutt Valley Horticultural Society.

Gillian, Lady Deane of Wellington became a Companion of the New Zealand Order of Merit (CNZM) for services to philanthropy.

Gillian and her husband Sir Roderick Deane have an abiding interest in New Zealand native plants and gardens. Gillian and Roderick have developed from old cow paddocks a large native tree garden, more than 30 acres (12 ha) in area, with extensive resuscitated wetlands, which now has four Queen Elizabeth National Trust covenants over them to ensure their protection. The Deane's have also supported the restoration of Nga Manu Gardens near Waikanae where native mistletoe is being successfully reintroduced.

Marie Wright in 2017, alongside Porirua City Councillor Mike Duncan, when she was awarded the Green Thumb Award.

Jocelyn Dobson, 2020 recipient of the Frank Penn Memorial Award for service to a local rose society.

Gillian, Lady Deane (with feathered friend), 2020 CNZM.

Long-standing RNZIH member **Dr George Mason** of New Plymouth became an Officer of the New Zealand Order of Merit (ONZM) for services to conservation, philanthropy and the community. Through the George Mason Charitable Trust, Dr Mason has been a generous supporter of horticulture and the environment. The *Taranaki Daily News* wrote an informative article which is online at www.stuff.co.nz/taranaki-daily-news/news/118430310/new-year-honours-dr-george-mason---the-environmentalist-whos-donated-more-than-5m.

Taking Stock: Resolving New Zealand's Cultivated Plants Problem A project of the Royal New Zealand Institute of Horticulture

The New Zealand cultivated plants project is a new collaboration among scientists, botanic gardens, horticultural societies and plant producers in New Zealand. The project goal is to significantly improve the documentation and recording of cultivated plants in New Zealand by registering species missing on 'official' databases – the NZ Plant Names Database (Ngā Tipu o Aotearoa)¹, the New Zealand Organisms Register (NZOR)², and MPI's Plants Biosecurity Index (PBI)³. This will facilitate better management and utilisation of plant biodiversity in New Zealand.

The project began January 2020, thanks to three-year support from the Ministry for Primary Industries' Sustainable Food & Fibre Futures fund, with co-funding provided by the Royal New Zealand Institute of Horticulture (RNZIH), Manaaki Whenua – Landcare Research (MWLR), and horticultural organisations.

The project is led by Murray Dawson of the RNZIH, with many collaborators including Botanic Gardens Australia and New Zealand – NZ Region, International Dendrological Society – NZ Branch, International Plant Propagators' Society – NZ Region, Massey University, NZ Plant Producers Inc., NZ Rhododendron Project Group, NZ Tree Crops Association, and the Orchid Council of NZ Inc.

There are many thousands of species of cultivated plants in New Zealand⁴, yet lack of knowledge and poor cataloguing of which exotic species are actually present impacts our prosperity: we do not adequately know what is in this country, what it is called, or where it is growing. Innovation is severely hampered by barriers to importing new germplasm, uncertainty about presence (biostatus), validity of names (botanical nomenclature), and the correct identities of plant material of economic interest. Pre-border problems arise for commercial growers and plant breeders trying to import new selections, germplasm, and breeding stock under the Hazardous Substances and New Organisms (HSNO) 1996 Act, because of the limitations of the MPI Plants Biosecurity Index (PBI) in determining if species are already in New Zealand⁵. The PBI is incomplete, and also lacks taxonomic authorities, references, and synonymy from which to validate names.

In this project we will help address these issues by capturing and resolving names, identities, and biostatus for numerous plant species of interest to horticulture, production, and biosecurity sectors that are not currently listed on the PBI. This will be achieved by coordinating the capabilities and resources of plant producers, breeders, collection managers, researchers, regulators, and other interest groups.

Key activities include:

- Searching, collating and evaluating scattered information held in living collections, stocklists, nursery catalogues, horticultural and botanical literature, and herbarium specimens to confirm that species are present in New Zealand.
- Checking the taxonomy of species and documenting the taxonomically correct and current names.
- Development of sets of validated plant names (properly referenced and with evidence such as herbarium specimens or nursery catalogue listings) to establish their presence in New Zealand. Resolved names and associated data will be inputted into two taxonomic databases: the New Zealand Plant Names Database (Ngā Tipu o Aotearoa) and the New Zealand Organisms Register (NZOR)⁶.
- For an estimated 600–800 species with the best evidence-based cases for presence in New Zealand, applications will be submitted to the Environmental Protection Authority (EPA) for Section 26 determinations.

This work will help resolve major knowledge gaps for faster and more informed plant importation and regulatory decisions, improved access to new germplasm for plant production and breeding, and more effective management of biosecurity, pest plants, disease and biocontrol vectors, and living collections.

This project is related to an earlier initiative of the RNZIH – the NZ Plant Collection Register.

Please contact us if your group can contribute to this important initiative.

Project leader: Murray Dawson (RNZIH) (email: dawsonm@rnzih.org.nz)

Project chair: Marion MacKay (Massey University)

Project finance manager: Chris Webb (RNZIH)

Notable Tree Notes

In this newsletter we regularly feature trees from the New Zealand Tree Register. The idea is to highlight a specimen or group with outstanding attributes and/or an especially interesting history.

AR/1504 – Agathis australis (kauri), 'The Glasgow Tree', Nihotupu, Waitakere

Wasley's Bush, located in a relatively flat basin at the headwaters of the Nihotupu Stream contained the best kauri forest in the Waitakere ranges west of Auckland. Isolated from the mills in Henderson by a ridge of ranges, and unable to drive logs over the Nihotupu falls to the south, the forest was not successfully logged until the mid-1890s when Messrs Mander and Bradley built a mill at Nihotupu, which became the site of the now disused auxiliary reservoir there. The milled timber was raised by a horse-driven capstan to the ridge, and then taken by tram down through the hills to the timber yards in Henderson proper.

Approximate location of AR/1504 – the former 'Glasgow' tree at Nihotupu, Waitakere. https://register.notabletrees.org.nz/tree/view/1504

The trees in the bush were particularly large for the Auckland region. John Bethall described walking through the forest:

> "The finest kauri bush I have ever seen... trees [trunks] 60, 70, 80 feet without branch or knot".

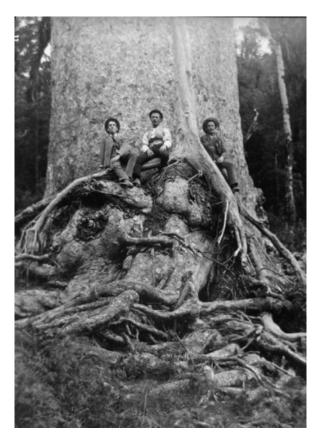

A contemporary account describes the size of some of the trees:

"In this one patch of bush which is known as Wasley's from the name of the old settler who owns it I have measured trees of 42 feet, 39 feet and 35 feet in girth but I am told that there is a tree in the same bush within a mile of these measuring 58 feet".

During an official visit in 1895 to the site of mill, David Boyle, the 7th Earl of Glasgow and Governor of New Zealand at the time was so impressed by one particular tree (likely the 42 foot girth tree above), that he penned the following letter to the Auckland County Council:

"Sir,—I have lately been up to the ranges (near Nihotupu) to see the two magnificent kauri pines which your County Council was public-spirited enough to purchase, in order that they might not be destroyed in case the rest of the trees in that neighbourhood are felled. While there, I had some conversation with a gentleman who is about to make an offer for the timber, and he hopes to be successful. It has occurred to me that a still finer kauri than those you have bought which I saw standing about a third of a mile from the two I have alluded to might be preserved in the same way. It is a magnificent tree, and it seems a pity to let it be destroyed. I therefore take the liberty of writing to say that if the County Council or any other body would take action to preserve the tree I shall be happy to subscribe £3 towards the object, and shall send you a cheque for that amount with pleasure when you inform me that the tree is purchased. It is situated on the right of the bullock track, to the right of those trees as you go to them from Auckland, but further off at a distance I should think of about a third of a mile from the other two."

That tree became known as the Glasgow Tree. Described as anywhere from 12 to 14 feet in

'Giant kauri tree, Nihotupu, 52' circumference'. Photographer Unknown, JT Diamond Collection, Auckland Library JTD-08F-05174.

diameter (3.7 to 4.3 m) or up to 52 feet (15.9 m) in girth in one photograph labelled as the tree, with a bole to 80 ft. (24 m), it would be one of the largest, if not the largest ranked kauri tree today, with a wood volume in the stem approximately 280 cubic meters outside bark if the 14 ft. diameter is used.

Although reserved around 1895, the tree did not last long past that time. A fire killed it in 1898, and rather the wood go to waste, it was felled for its timber (with the permission of the Earl, who had since returned to the UK). Fourteen foot diameter sections were taken for exhibition at Christchurch soon after. The same fate befell the mill, as it too was destroyed by fire in 1899. But its work was almost done, with the last of the trees in the area milled later that year.

Scope

On the basis of information provided and in accordance with Service Engagement Standard 2 Compilation of Financial Information, we have compiled the financial statements of Royal NZ Institute of Horticulture (Inc.) for the year ended 31 December 2019.

These statements have been prepared in accordance with the accounting policies described in the Notes to these financial

Responsibilities

The Governing body are solely responsible for the information contained in this financial report and have determined that the accounting policies used are appropriate to meet your needs and for the purpose that the financial statements were prepared.

The financial statements were prepared exclusively for your benefit. We do not accept responsibility to any other person for the contents of the financial statements.

No Audit or Review Engagement Undertaken

Our procedures use accounting expertise to undertake the compilation of the financial statements from information you provided. Our procedures do not include verification or validation procedures. No audit or review engagement has been performed and accordingly no assurance is expressed.

ndependence

We have no involvement with Royal NZ Institute of Horticulture (inc.) other than for the preparation of financial statements and management reports and offering advice based on the financial information provided.

Disclaimer

We have compiled these financial statements based on information provided which has not been subject to an audit or review engagement. Accordingly, we do not accept any responsibility for the reliability, accuracy or completeness of the compiled financial information contained in the financial statements. Nor do we accept any liability of any kind whatsoever, including liability by reason of negligence, to any person for losses incurred as a result of placing reliance on this financial report.

Statement of Service Performance

16

Royal NZ Institute of Horticulture (Inc.) For the year ended 31 December 2019

Description of Entity's Outcomes

Over the past year, we responded to all incoming correspondence to provide advice, information and guidance. We have overseen several over charitable trust's under our guidance and supported plant conservation projects, including compilation of a 'National Register of significant collections.

Provided educational and scientific publications on Horticultural matters and held workshops and tours on ornamental and commercial horticulture.

Additional Output Measures

Additional Output measures Mission and Outcome: To encourage and improve horticulture in New Zealand by promoting the understanding, appreciation, conservation and use of plants.

Statement of Financial Performance

Royal NZ Institute of Horticulture (Inc.) For the year ended 31 December 2019

'How was it funded?' and 'What did it cost?'

Statement of Accounting Policies

Royal NZ Institute of Horticulture (Inc.) For the year ended 31 December 2019

Basis of Preparation

The entity has elected to apply PBE SFR-A (NFP) Public Benefit Entity Simple Format Reporting - Accrual (Not-For-Profit) on the basis that it does not have public accountability and has total annual expenses equal to or less than \$2,000,000. All transactions in the Performance Report are reported using the accrual basis of accounting. The Performance Report is prepared under the assumption that the entity will continue to operate in the foreseeable future.

Goods and Services Tax (GST)

The entity is registered for GST. All amounts are stated exclusive of goods and services tax (GST) except for accounts payable and accounts receivable which are stated inclusive of GST.

veT omo

Royal NZ Institute of Horticulture (inc.) is wholly exempt from New Zealand income tax having fully complied with all statutory conditions for these exemptions.

Bank Accounts and Cash

Bank accounts and cash in the Statement of Cash Flows comprise cash balances and bank balances (including short term deposits) with original maturities of 90 days or less.

Fier 2 PBE Accounting Standards Applied

There were no Tier 2 accounting policies applied.

Changes in Accounting Policies

Royal New Zealand Institute of Horticulture (Inc.) No. 1, 2020

There have been no changes in accounting policies. Policies have been applied on a consistent basis with those of the previous reporting period.

Financial report

The RNZIH made a cash loss of \$5,595 for the year ended 31 December 2019, similar to the loss of \$5,610 for the year ended 31 December 2018.

Additional expenses during 2019 were incurred holding the one-day RNZIH symposium at Te Papa, Wellington on 24th October. We have held our membership subscription at current levels for several years despite steadily increasing costs.

About 25 members have not yet paid their 2020 subscription. We thank those of you who have paid for your support.

For 2020 to 2023, we will be managing funds in a separate account for a new 'Taking Stock: Resolving New Zealand's Cultivated Plants Problem' project funded by the Ministry for Primary Industries' Sustainable Food & Fibre Futures fund, with co-funding provided by the RNZIH, Manaaki Whenua – Landcare Research, and others.

Chris Webb Treasurer RNZIH
