1. An interior view of one of our many propagation houses equipped with automatic mist and underfloor electric heating. Over 11½ million plants put-through annually.
2. Lining out area. This view shows container grown export crops being hardened before packing and despatch.
3. A nursery view of field planted dwarf growing nectarine and peach.
4. A section of our twelve acre container unit serving the New Zealand market.

EXPORT AWARD 1975

**DUNCAN & DAVIES LTD**

# **1977 United Kingdom Price List**

---

## **TERMS OF SALE:**

- (a) Minimum numbers: 50 plants per variety and 1,000 plants per order. For orders under 1,000 plants a New Zealand \$20.00 documentation charge will be made.
- (b) All plants listed are offered subject to crop and to being unsold on receipt of order.
- (c) Whilst every effort will be made to maintain our prices during the coming year, the right is reserved to make adjustments without prior notice for any substantial increases beyond our control: e.g. air freight costs.
- (d) All prices are quoted in New Zealand currency. Exchange rates at 1st August 1976—New Zealand \$1.00 = Sterling 55.5 pence.
- (e) All prices are quoted C.I.F. (landed) London Heathrow Airport.
- (f) Ordering: On the forms provided, complete required numbers, sign and return one copy.

## **TERMS OF PAYMENT:**

- (a) Irrevocable Letter of Credit.  
or
- (b) Sight Draft, for invoice value, payable at the current rate of exchange for Demand Drafts on New Zealand at date of payment, together with your Bank's charges: All the New Zealand Bank's charges including interest, our cost.

We will consider requests for other terms of payment from established clients.

### **INSURANCE COVER:**

On consignment our plants will be insured against damage in transit with Lloyds Agent in New Plymouth, New Zealand. It will be a condition of the policy that they must be inspected on arrival and any damage found reported to:

- (a) The carrying airline, immediately
- (b) The nearest Lloyds Agent within seven days of discharge from the vessel of conveyance or within three days of receipt.

Reports of such damage within the times specified shall be acknowledged by the carrying airline and the insurers as properly given and shall in such case constitute written notice of complaint for the purposes of our guarantee. No responsibility for losses will be accepted by our Company unless the above conditions are complied with.

### **GUARANTEE:**

Duncan and Davies Limited takes every reasonable precaution consistent with normal practice within the trade to ensure that its trees, plants and other produce supplied in accordance with orders it shall have accepted are true to name and description and apart from this statement IT IS A CONDITION OF SALE that any other statements or express or implied conditions or warranties statutory or otherwise in relation thereto are excluded. It is a further condition of sale that such liability as may be assumed by Duncan and Davies Limited at its absolute discretion having regard to all the circumstances shall be limited to the amount of the purchase price and that in any case retention for ten days after delivery without written notice of complaint within that time shall constitute acceptance by the purchaser and a release from any further obligation on the part of Duncan and Davies Limited to be observed or performed in correction with the order.

---

### **KEY:**

Seedlings—taken direct from open ground or flat trays.

Liner seedlings—seedlings grown-on in small containers.

1 year transplants—seedlings or hardwood cuttings grown-on for one year.

R/C—rooted cuttings—well rooted in plixie trays (1½" diameter holders).

Liners—rooted cuttings grown-on in small containers.

1 year C.G.—one year cutting grown—grown-on for approximately one year in larger containers.

# Duncan & Davies of New Zealand

We came to Harrogate last year and you may have noticed our stand at the 1976 B.G.L.A. Exhibition . . . . If you missed seeing us make a date to visit with us in March '77.

PERRY SOLE  
Export Manager

We will be at Harrogate again with plant exhibits and friendly information about the plants, the nursery, New Zealand and most important, how easy it is to obtain our product.

Perry Sole, Export Manager, will be in attendance on our stand throughout the show and will be only too pleased to help you in any way possible.

He has been with Duncan & Davies for many years and is well acquainted with every facet of company operations especially, of course, exporting plants, so remember—stop and chat—see you at the show.

For many years we have exported our plants all over the world and can safely say that experience gained in growing, packing, despatching and administration specifically for the export market will ensure you receive the right plants in top class condition, at the right place, at the right time.

Fast air freight deliveries to the United Kingdom mean that your plants will arrive at London Airport only 36 hours after leaving New Zealand.

Take advantage of Southern Hemisphere growing conditions—WE ARE CLOSER THAN YOU THINK.

## **Duncan & Davies Nurseries**

**HOW WE BEGAN:** In 1899 on a one acre site in the New Plymouth suburb of Westown Mr. James Robertson Duncan commenced nursery operations. Then fifteen years old Victor Caddy Davies was apprenticed to Mr. J. R. Duncan in 1902 to learn the craft of horticulture and this association eventually formed a partnership in 1910. Mr. J. R. Duncan died in 1914 but his name was perpetuated through his estate as continuing partner. Mr. V. C. Davies, now a venerable but active 89 years of age, purchased the business outright in 1945. His acumen and devotion over the intervening years were the keys to the expansion to 250 acres and the entry into export markets. He is still governing director and is still to be found in the company's New Plymouth garden centre dispensing his knowledge on most days. Mr. V. C. Davies was the recipient of the O.B.E. in 1954 and holds the Veitch Memorial Gold Medal presented by the Royal Horticultural Society of Great Britain for helping to advance the science and practice of horticulture.

Duncan & Davies is still a family business with two sons, Trevor and Neville, taking over the development and administrative roles as co-managing directors. With them is a team of skilled executives and nursery staff drawn from around the world, which peaks at about 220 during the winter. Over the years Mr. Trevor Davies has devoted much personal interest in furthering the companies export trade and can take credit for our present technological achievements in this field.

**OUR NEW ERA:** Seven years ago we moved away from our fifty acre New Plymouth Westown suburb site to the present site located at Brixton on the outskirts of the small town of Waitara some nine miles north of New Plymouth. The new nursery is situated in the centre of one of the richest Taranaki growing areas. Taranaki is a large province situated on the West Coast of the North Island, a lush grass farming province famous for its cheese production. An abundance of sun, moisture and light free draining volcanic soil creates ideal growing conditions for most kind of nursery stock. Currently there are 250 acres of land under production and annual propagation is well in excess of one million units per year and total stock turns over every two years. One sixth of this total nursery production goes overseas to our export markets. Our present expansion makes the company the largest producer of ornamental trees and shrubs in New Zealand and almost certainly holds that ranking in the Southern Hemisphere. Our growth will continue to develop and the future looks bright and clear. The company's research and development department is producing a steady supply of new plant clones and as we exploit the rich and unique New Zealand flora many exciting new plants await their turn to step onto the world stage.
