WHOLESALE TREE & SHRUB LIST AUGUST 1977

Name : _____

Address : _____

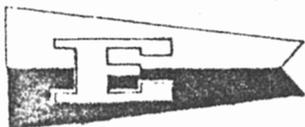

- * Get best sales results with DUNCAN & DAVIES quality plants.
- * With the Finest Quality plants we have grown for years.
- * With an early root pruning and lifting programme.
- * With an additional service in Prebagging certain Field grown crops into a special container mix to extend their sales life.
- * And a great desire to give all old and new customers the best possible service.

TO AVOID ANY LATER CONFUSION WE ASK YOU TO PLEASE READ THE FOLLOWING NOTES CAREFULLY.

1. All prices include freight and labelling.
 2. All listed evergreen prices include balling and bagging charges.
 3. All listed deciduous prices are shown as Bareroot only, remember Balling or Bagging will be an additional charge to the prices shown.
 4. Please understand that we grow a great many plants in Open Ground and that these plants cannot be lifted all at one time. We have a certain lifting pattern to which we adhere to and therefore it is our custom to deliver as we lift in crop rotation. It follows that crops ordered from this and future lists will be delivered to you as they come ready, or to your specific instruction. You will be informed if any crop ordered is sold out.
- * PLEASE NOTE our good Container list can be located directly after the Open Ground list. Please do not miss these quality products, ready for immediate Garden Centre sale.

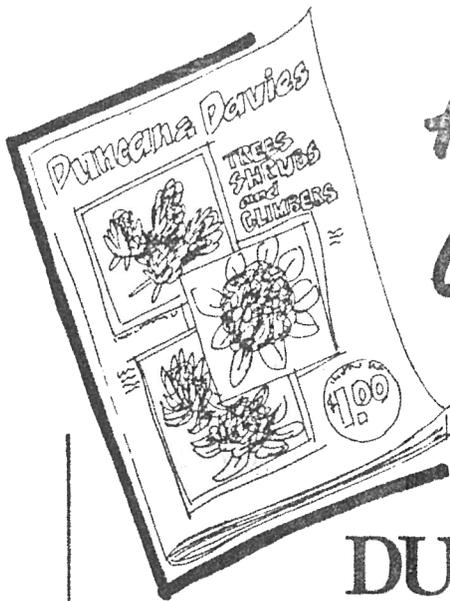

THIS LIST CANCELS ALL PREVIOUS TRADE LISTS.

SALES MANAGER'S EDITORIAL :

"SELLING SILENCE" - A message to all plant retailers.

Noise pollution is our newest ecological concern. As many of us are aware plants can be used :-

- 1) As insulators keeping our homes cooler in summer, warmer in winter.
- 2) Miniature air filtration operators.
- 3) Social and physical barriers.
- 4) Wind protection.
- 5) Landscape creators ! Enhancing property value and providing beautification.
- 6) Noise pollution preventers - In our ever increasing busy land, noise is a new menace and plants can and do play an important place in our defence strategy.

Planting in depth using trees and shrubs will reduce noise depending upon the depth and type of plant used by as much as 25%. It is becoming essential to create not only a garden but a haven, a quiet place to mend frayed nerves and tired bodies. Ecology is now a major concern. With spiraling inflation, rising petrol prices etc. people are turning more and more to their own gardens for recreation and relaxation, and as a means of increasing the value of their homes.

The wise plant retailer can and will capitalise on the trends and promote the many benefits bestowed by plants and the effective use of plantings to Insulate, Filtrate, Protect, Beautify, Increase property value and by no means least, provide peace and quiet.

The wise plant retailer will find that people are willing to listen to his story and experiment with plantings that can provide them with these many benefits at such small cost - especially a cost that continues to appreciate and not to depreciate like so many do these days.

Remember when selling Silence - Silence can be Golden in more ways than one!

N.Z.N.A. Ornamental Grass Promotion : CAREX EVERGOLD.

DUNCAN & DAVIES LTD will be marketing a NEW ornamental grass in November this year and we are asking for your preorders Now. See the description of this lovely Japanese Golden Grass, with the bewitching botanical name of HAKONECHLOA MACRA ALBO AUREA, in the main body of our list. We can't show you samples because the grass is in its winter dormant stage. Ask to see the coloured photographs carried by our Company Sales Representatives. Plants purchased now will be delivered in November in all their Spring foliage finery. The plant will be advertised nationally in Women's Weekly and N.Z. Gardener magazines, and a four colour poster will be presented free with first purchase.

HAKONECHLOA MACRA ALBO AUREA - Japanese Golden Grass
pronounce - HAK-O-NEE-Klo-A.

- * NEW from JAPAN we bring you a beautiful golden variegated perennial, ornamental grass to enliven Garden Centre Spring and Summer sales.
- * A clump forming grass producing strong stems carrying pointed leaf blades of light green heavily variegated in cream and gold.
- * USE : Stream or pondside, front of shrubbery, groundcover under light foliaged trees, pebble garden, or in the Japanese manner in ornamental containers for terrace or patio.
- * BEST ENVIRONMENT : Partial shade in good loamy soil.
- * Plant will be produced in a 4" pot or PB 3 and will be priced at \$1.50 each - usual quantity discounts applying.
- * Duncan & Davies will advertise the product nationally in November 1977 and provide a 4 colour point of sale poster free with first purchase.

DON'T MISS OUT - PRE-ORDER YOUR HAKONECHLOAS NOW !

Presenting a new era in Duncan & Davies Ltd plant marketing. September 5th to 17th, T.V.2 will project our first commercial Television production. This will be a thirty second duration film promoting our superb range of evergreen MAGNOLIA GRANDIFLORA cultivars - SAMUEL SOMMER, ST. MARY, GOLIATH, RUSSET and FERRUGINEA.

We have not launched our first effort Nationally, but instead selected as a pilot test the Wellington T.V. viewing area. The Wellington T.V. area covers from Marlborough through Wellington to east coast Hastings and West Coast New Plymouth, and all areas in between.

We trust our retail customers in this area will join with us in this promotion and take the opportunity to stock their sales yard with these fine MAGNOLIA products. Promotional point of sale posters and brochures will be available - all entirely free - to aid your sales.

DON'T BE LEFT OUT IN THE COLD - ORDER YOUR MAGNOLIAS NOW.

REMEMBER IT TAKES TIME TO PROCESS, PACK AND DESPATCH YOUR ORDER.

L207	K. VARIEGATA - (Previously listed as K. GOLD BAND) - Deep green foliage margined creamy yellow.	PB8	30/40	2.40

The variegated Pohutukawas are very suitable for all gardens, especially the smaller ones. They grow slowly into small trees, but by careful pruning can be kept into well shaped reasonably large sized shrubs. These plants are very wind hardy and will even grow fairly well in poor soil conditions. The flowering display can be just as effective as for the species. We suggest there's a place for one in most gardens not subjected to severe Winter frosts.

VARISHADE

Shades excess Summer sunlight and without removal transmits Winter sunlight.

Inside or outside any plastic or glass structure you can help control the amount of solar light and heat with VARISHADE and reduce operating costs. This unique non-toxic Shading can be sprayed, roller-coated, dipped or brushed onto glass or any plastic.

This wet-dry cycle will keep repeating indefinitely. You can regulate the amount of shade you desire by the amount of VARISHADE coating applied.

Rain or outside water sprays will cause an exterior coat of VARISHADE to become practically transparent and thus let in more light when desired. After the rain or water sprays stop, the VARISHADE coating will dry and resume its shading effect.
