- *Get best sales results with DUNCAN & DAVIES quality plants.
- *With the Finest Quality plants we have grown for years.
- *With an early root pruning and lifting programme.
- *With an additional service in Prebagging certain Field grown crops into a special container mix to extend their sales life.
- *And a great desire to give all old and new customers the best possible service.

TO AVOID ANY LATER CONFUSION WE ASK YOU TO PLEASE READ THE FOLLOWING NOTES CAREFULLY.

- 1. All prices include freight and labelling.
- 2. All listed evergreen prices include balling and bagging charges.
- 3. All listed deciduous prices are shown as <u>Bareroot only</u>, remember Balling or Bagging will be an additional charge to the prices shown.
- 4. Please understand that we grow a great many plants in Open Ground and that these plants cannot be lifted all at one time. We have a certain lifting pattern to which we adhere to and therefore it is our custom to deliver as we lift in crop rotation. It follows that crops ordered from this and future lists will be delivered to you as they come ready, or to your specific instruction. You will be informed if any crop ordered is sold out.
 - * PLEASE NOTE our good Container list can be located directly after the Open Ground list. Please do not miss these quality products, ready for immediate Garden Centre sale.

THIS LIST CANCELS ALL PREVIOUS TRADE LISTS.

SALES MANAGER'S EDITORIAL :

"SELLING SILENCE" - A message to all plant retailers.

Noise pollution is our newest ecological concern. As many of us are aware plants can be used :-

- 1) As insulators keeping our homes cooler in summer, warmer in winter.
- 2) Miniature air filtration operators.
- 3) Social and physical barriers.
- 4) Wind protection.
- 5) Landscape creators ! Enhancing property value and providing beautification.
- 6) Noise pollution preventers In our ever increasing busy land, noise is a new menace and plants can and do play an important place in our defence strategy.

Planting in depth using trees and shrubs will reduce noise depending upon the depth and type of plant used by as much as 25%. It is becoming essential to create not only a garden but a haven, a quiet place to mend frayed nerves and tired bodies. Ecology is now a major concern. With spiraling inflation, rising petrol prices etc. people are turning more and more to their own gardens for recreation and relaxation, and as a means of increasing the value of their homes.

The wise plant retailer can and will capitalise on the trends and promote the many benefits bestowed by plants and the effective use of plantings to Insulate, Filtrate, Protect, Beautify, Increase property value and by no means least, provide peace and quiet.

The wise plant retailer will find that people are willing to listen to his story and experiment with plantings that can provide them with these many benefits at such small cost — especially a cost that continues to appreciate and not to depreciate like so many do these days.

Remember when selling Silence - Silence can be Golden in more ways than one!

The variegated Pohutukawas are very suitable for all gardens, especially the smaller ones. They grow slowly into small trees, but by careful pruning can be kept into well shaped reasonably large sized shrubs. These plants are very wind hardy and will even grow fairly well in poor soil conditions.

The flowering display can be just as effective as for the species. We suggest there's a place for one in most gardens not subjected to severe Winter frosts.

VARISHADE

Shades excess Summer sunlight and without removal transmits Winter sunlight.

Inside or outside any plastic or glass structure you can help control the amount of solar light and heat with VARISHADE and reduce operating costs. This unique non-toxic Shading can be sprayed, roller-coated, dipped or brushed onto glass or any plastic.

This wet-dry cycle will keep repeating indefinitely. You can regulate the amount of shade you desire by the amount of VARISHADE coating applied.

Rain or outside water sprays will cause an exterior coat of VARISHADE to become practically transparent and thus let in more light when desired. After the rain or water sprays stop, the VARISHADE coating will dry and resume its shading effect.
