64121

LEUCADENDRON SESSILE

A rounded shrub to 1.5m in height, light green foliage, large bright yellow floral bracts. A male clone.

MALUS TSCHONOSKII

A tall pyramidal shape, large grey-green foliage that assumes fabulous autumn colours in orange-red shades.

PHILADELPHUS FROSTY MORN

Narrow upright growth habit to 2m in height with masses of double white flowers. An excellent variety for the smaller garden.

PROTEA CYNAROIDES IMPERIAL RED

Strong growing rounded shrub to 2m in height, excellent foliage, superb large king size flowers in deep rose red with a silver grey central boss of stamens. Fabulous cut flower.

PIERIS JAPONICA TICKLED PINK

A preview of our 1982 promotional product. A "Lily of the Valley Shrub" with true pink flowers plus a strong sweet perfume. Sure to be a winner with the public.

PSEUDOPANAX CYRIL WATSON

A superb hybrid with large trifoliate leaf - a strong heavy textured leaf design sure to be a popular landscape feature shrub. Named for our former long serving sales manager, Mr Cyril Watson.

PRUNUS PERSICA PINK CASCADE

A beautiful sport of P. Persica Cascade. A weeping cascade of double sugar pink flowers. A marvellous feature plant for the smallest garden.

PRUNUS INCAME X CAMPANULATA

An interesting cross between these two lovely ornamental cherries combining the best features of both. Narrow, upright pyramidal growth habit with pink bell like flowers.

SALIX MATSUDANA X ALBA 'AOKAUTERE'

A new disease resistant clone with a strong upright pyramidal growth habit and fine grey-green foliage. An excellent shelter tree and first class for planting alongside streams and waterways etc.

VIBURNUM BEWLEYS VARIEGATA

Large shrub, rounded habit, evergreen foliage bright green splashed creamy yellow. Masses of small white scented flowers in spring.

VIBURNUM OPULUS AUREUM

Large shrub, rounded habit, typical snowball tree foliage but golden yellow in spring and early summer toning to light green and back to gold in autumn. Large creamy white rounded flower heads.

VIBURNUM PLICATUM LANARTH

A selected form of the Japanese Snowball Tree. This shrub has an upright horizontal branching habit and flat flower-heads of large sterile flowers in spring. This is a fine form and a first class garden plant.

VIBURNUM PLICATUM PINK BEAUTY

One of the latest cultivars of the Japanese Snowball Tree to appear on the garden stage. A strong growing upright shrub with semi-horizontal branching habit and flat flower heads of large white sterile flowers in spring. These flowers are reputed to fade to a pale pink shade as they mature.
