POSTAL ADDRESS: P.O. BOX 340, NEW PLYMOUTH, NEW ZEALAND
LOCATION: WAITARA ROAD, BRIXTON, TARANAKI
PHONE: WAITARA 8789, TELEX: SHRUBS NZ31363, CABLES: SHRUBS

WELCOME TO 1986

Another year is upon us, and the weather conditions over the past few weeks have set the scene for yet another fabulous year in the **"PLANT WORLD"**.

Product is looking tremendous, growth is phenomenal, keeping our production team really on the move to keep apace of all that is required to once again produce for you the "Retailer" the very best that Duncan & Davies can achieve.

I would like to take this opportunity of thanking all those Retailers who participated in our Indent Programme and to assure you, each and everyone, of service for 1986.

Stocktaking is under way now, Indent Confirmations are running to schedule, and we should have these back to you early March.

Enclosed is our **February-March** Trade List covering our summer range of product. All product is ready for immediate despatch, however if ordering in February to secure product you do not require until March, please clearly indicate this and we will carry those instructions through.

VISITATIONS

Many Retailers have already booked times to visit our Production Nursery, many more will. Summer is a good time to see the product growing for your winter sales. Take the opportunity the quieter summer months give to come and visit us.

One necessary requirement: Please phone and book your viewing day well in advance. We would love and want to see as many of you as possible. Please come!

Thanks folks for your great effort last season, it was much appreciated.

Kind regards.

Robyn N Willis
NZ SALES MANAGER

NEW CONCEPT FROM DUNCAN & DAVIES

Patio Plants

*Large, bushy plants ready for immediate use
on the patio, deck or entry.*

S60010	SOPHORA MICROPHYLLA 'EARLYGOLD'	E	2Lt	30/40	6.50
--------	--	---	-----	-------	------

A newly developed dwarf Kowhai that is very slow in growth and compact in habit eventually making a small, neat shrub, pyramidal in shape, that could reach, in time, from one to two metres in height.

Foliage is small, finely textured and a glossy deep green in summer and semi deciduous to fully deciduous in winter dependent upon climatic conditions.

An abundance of elegant lemon yellow flowers are produced in pendulous clusters from late winter through into spring. Grows easily in most garden soils but does prefer an open sunny situation for optimum growth and flowering.

An excellent hardy, small growing shrub ideal for the home garden with the added ability of succeeding well in coastal areas.

PLANT CODE	PLANT NAME	EVERGREEN - E DECIDUOUS - D	PROCESS METHOD	GRADE	PRICE
---------------	------------	--------------------------------	-------------------	-------	-------

S60030 **SOPHORA MICROPHYLLA 'GOLDILOCKS'** E 5Lt 120/150 6.50

A newly developed Kowhai selected for its early flowering abilities and great abundance of flowers produced over a long flowering season.

A small upright growing tree with an open irregular vase shape, which will eventually make a dainty garden tree with an anticipated ultimate height of some three to four metres.

The foliage is small and fine in texture of rich green in summer and semi-deciduous to fully deciduous in winter dependent upon climatic conditions.

Bark is an attractive silvery-grey in maturity and makes a lovely colour combination when combined in spring with the dark brown velvety flower spurs and the rich golden yellow flowers so abundantly produced.

Grows easily in most garden soils, but does prefer an open sunny situation for optimum growth and flowering. An excellent hardy small growing tree ideal for the home garden.

[Prices include 75c Levy to NZNA]
