

Dear Customer

Welcome to November **T**IME OUT!!
...NEWS

Spring, Summer, Winter, take your pick this is the season of all seasons. Shorts one day, long johns the next. It may be hard deciding how to dress, but deciding what to promote?... Well, the colour of the masses of flowering plants does it for us. This month we would like to bring to your attention product to compliment the flowering plants. Not only do we have a range of spring and summer product to tell you about but we have another bargain basement price list.

The first bargain basement price list was phenomenally successful so we have put together a second list and are able to offer more of the same but remember it is first up, best dressed. We have had to, regrettably make some of the product on the first list unavailable even after you had ordered it. This was because the plants were assessed and the price list put together while many of the plants were still out in the field. When we came to bag them some were not up to a bargain basement grade because of poor rooting, shape or some other reason. We are sorry but we have had no other option but to make the product unavailable. We have endeavoured with this list to mention only that which we are confident is available.

As well as sold outs in the bargain basement price list we are getting to the end of many of Duncan & Davies Standard Grade lines which has been frustrating for some of you. Indent ordering is one of the ways that we can help prevent that frustration for you next year. So coming soon is D&D's spectacular 1993 indent catalogue. We'll keep you posted.

Happy summer selling

Duncan & Davies

TIME OUT!!

November's Novelties

We have decided that since all the flowering plants are promoting themselves furiously at this time of year that we should promote a group of plants that are usually grown for their foliage effect. These plants are easily sold because of their special features which perpetuate throughout the year providing great contrast to flowering shrubs.

Contrast by virtue of ... Foliage Variegations

AUCUBAS

A small group of medium to large shrubs that will thrive in almost any soil provided they get partial or full shade. They even grow exceptionally well in shaded alley ways on the southern side of buildings. The spectacular golden variegations of our named varieties and the shiny red berries of the female plants excel as well in borders tubs and as backdrop evergreen shrubs.

Aucuba J Crotonoides (Female)

PB5 20/30 \$4.45

An absolutely reliable performer with large, oval, glossy, rich green leaves boldly splashed and spotted golden yellow. When planted in male company will give great crops of red berries.

Aucuba J Mr Goldstrike (Male)

PB5 20/30 \$4.45

Good contrasting Male company for Crotonoides. Lightly gold speckled leaves of deep green. Plant at least one male for every six females to guarantee flower set.

Aucuba J Sulphur (Female)

PB5 20/30 \$4.45

Slower growing than the previous but has deeply toothed leaf margins which are widely edged by an irregular sulphur yellow band giving a third foliage effect in this group. Ideal for more shaded areas.

CORYNOCARPUS

The varietal forms of Corynocarpus Laevigatus that we have introduced will all slowly grow to become small densely foliated and rounded trees of outstanding value. Their variegated foliage gives them excellent colour value in the shrubbery and their slow growth and full foliage cover means that they do not out grow this function as many trees do. They will also make excellent lawn specimens. They require a deep, rich soil and are wind tolerant but require some shade especially when young.

Corynocarpus L Variegatus

PB8 30/40 \$4.85

Rich green foliage broadly margined golden yellow.

TIME OUT!!

...Products

Corynocarpus L Alba Variegatus

PB8 30/40 \$4.85

Glossy deep green foliage broadly margined creamy white with a tendency to wave and undulate.

Corynocarpus L Picturata

PB8 30/40 \$4.85

Foliage is broadly oval to round in shape, glossy rich green with the lower part of the leaf liberally splashed with golden yellow that runs up through the centre.

PSEUDOPANAX

Varietal members of the genus Pseudopanax are often used in a garden for the ornamental effect that their leaf shape provides. Other members of the genus are grown for their colour as well.

Pseudopanax Lessoni Gold Splash

PB6 20/30 \$6.50

A superb plant that fully deserves to be the success that it is. It grows to an erect, multi stemmed, bushy shrub of 1.2-1.5m with large, leathery palmate three to five lobed leaves of glossy emerald green, liberally splashed golden yellow.

***Contrast by virtue of ...
Foliage Colour***

PHOTINIA

The two varieties of Photinia that we offer have been immensely popular this year and we have lifted the most well advanced out of next year's crop to offer you the following in limited numbers. Both have a variety of uses in the garden due to their fast growth, wind tolerance and their dramatic red foliage that can be maintained year round by trimming and tipping. These plants have been recently trimmed to promote bright red new growth

Photinia Red Robin

PB12 40/50 \$6.75

New growth comes out in a shiny red-crimson lasting well before green takes over.

Photinia Glabra Robusta

PB12 30/40 \$6.75

A hardier variety. The larger, thicker leaves colour copper-red in spring, but not as brilliantly as Red Robin, and the green tones take over sooner.

LEUCADENDRON

Leucadendron Jester

PB6 20/30 \$5.95

This striking bush has leaves with showy salmon pink and cream margins and outstanding floral bracts broadly edged bright deep neon pink with a deeper rosy red central zone. Sensational as a cut flower.

NANDINA

Nandina D Richmond

DS 70/90 \$9.75

Brilliant spring and autumn foliage in colours of orange, apricot and red.

Contrast by virtue of ... Leaf Shape.

CORDYLINES & PHORMIUMS

Cordylines and Phormiums are synonymous with the landscape of New Zealand and play an important part in adding variety to man made landscapes. We offer two excellent cordylines and a two phormiums. Just as the cordylines are at opposite ends of the colour range the phormiums are at opposite ends of the size range.

Cordyline Australis Albertii

While the cream and green striped salmon-pink tinted leaves are well known it is less well known that the creamy white flowers are well scented and the berries are pale blue. A must for every garden.

10L 70/90 \$24.00

Cordyline Purple Tower

This vigorous growing variety has excellent purple colouring which mixes well with the all shades of green especially the lighter silver greens of other plants. Its leaf form is most striking when it pokes its head through lower growing shrubs in the manner of a true palm.

PB8 40/50 \$8.50

Phormium Jack Spratt

This small flax is best grown as compact clumps in rockery and border situations where its narrow bronzy brown leaves are not swamped by nearby plantings but serve to highlight the differences between foliage types.

PB5 20/30 \$5.20

Phormium Yellow Wave

This handsome low growing flax retains its brilliant golden yellow best when grown in full sunlight. To maintain good colour feed annually. The most versatile and popular hybrid flax produced to date.

DS 50/70 \$6.40

FERNS

Ferns provide a diversity fo foliage form. The tree ferns in particular give a garden a tropical, or forest feeling.

Fern Cyathea Smithii

Smaller tree ferns, lacy light green fronds. 2.5 to 4.5m

PB5 40/50 \$5.20

Fern Dicksonia Fibrosa (Golden Tree Fern)

It is hardy and wind tolerant and when older characterised by a golden brown collar of dead fronds hanging down the trunk which is quite decorative.

PB5 15/20 \$5.20

Fern Dicksonia Squarrosa

Characterised by a large spreading crown of deep green fronds with a harsh texture.

PB5 20/30 \$5.20
